Incident Response Guide Introduction

Developing an incident response plan is a critical step towards preparing a robust and effective incident management and technical response capability. Good incident management will help reduce the financial and operational impact on your business.

Information for planning and responding to a cyber incident can be found at

<https://www.cyberscotland.com/incident-response/>

Use these supporting documents to help you plan your response to a cyber incident.

Prepare Your Business Checklist:

Use this checklist to help prepare for, respond and recover from cyber incidents.

Emergency Contact List Template:

Use this document to capture business emergency contact details. Include staff names and contact details, emergency contacts, customers and supplier details. Make a digital copy of the document available in a place you can access it easily. Print a hard copy of the document and keep it in a safe place.

Incident Response Communications:

Core questions you need to address when planning and dealing with a crisis.

Legal Implications of a Cyber Incident:

Awareness of the key commercial and legal implications of a cyber incident is crucial to responding appropriately to any incident and mitigating the risks arising from it. In this document you will find points to consider, to help ensure the decisions you take during and in the aftermath of a cyber incident enable you to navigate out of choppy waters with minimal damage.

Additional advice to improve your cyber resilience
