Stryker attack wiped tens of thousands of devices, no malware needed

BleepingComputer - 16 March 2026 16:17

Last week’s cyberattack on medical technology giant Stryker was limited to its internal Microsoft environment and remotely wiped tens of thousands of employee devices. [...]

GlassWorm Attack Uses Stolen GitHub Tokens to Force-Push Malware Into Python Repos

The Hacker News - 17 March 2026 02:07

The GlassWorm malware campaign is being used to fuel an ongoing attack that leverages the stolen GitHub tokens to inject malware into hundreds of Python repositories.”The attack targets Python projects — including Django apps, ML research code, Streamlit dashboards,

and PyPI packages — by appending obfuscated code to files like setup.py, main.py, and app.py," StepSecurity said. "Anyone who runs

ClickFix Campaigns Spread MacSync macOS Infostealer via Fake AI Tool Installers

The Hacker News - 16 March 2026 18:11

Three different ClickFix campaigns have been found to act as a delivery vector for the deployment of a macOS information stealer called MacSync.
