ConnectWise Warns of New ScreenConnect Remote Access Flaw – Released Mitigation Steps

Cyber Security News - 07 September 2026 15:14

ConnectWise has warned customers about a newly identified security issue affecting file transfer behavior in ScreenConnect Remote Access Support and Access sessions. The issue impacts both cloud-hosted and on-premises ScreenConnect deployments, and the company has released interim mitigation guidance while it develops a permanent fix.

CC-4845 - Active Exploitation of Critical N-central Unauthenticated RCE Vulnerability

NHS Digital - 07 September 2026 15:18

Severity: Medium Successful exploitation of CVE-2026-86218 could allow an unauthenticated attacker to perform remote code execution

Magento StyleSmuggler zero-day exploited to deploy Linux backdoor

BleepingComputer - 07 September 2026 13:50

A zero-day vulnerability dubbed “StyleSmuggler” affecting all versions of Magento and Adobe Commerce is being exploited in attacks to deploy a backdoor. [...]

PEEP Turns Chrome and Edge Into Post-Compromise Backdoors for Host Command Execution

The Hacker News - 08 September 2026 00:42

Cybersecurity researchers have disclosed details of a complex Chromium-based post-exploitation toolkit called PEEP that masquerades as a bookmarks extension for the web browser.

Telerik UI Padding-Oracle Bug Chained to Unauthenticated RCE — Public Exploit Released

The Hacker News - 07 September 2026 17:50

A TantoSec proof-of-concept turns an AES-CBC “padding oracle” in Telerik UI for ASP.NET AJAX into unauthenticated remote code execution — but only against applications in a specific non-default configuration, and Progress patched the chain in July. There are no confirmed reports of exploitation in the wild.

N-able Issues Fourth N-central Hotfix in Five Weeks for Unauthenticated RCE Flaw

The Hacker News - 07 September 2026 15:01

Every on-premises N-central build below 2026.3.1.14 — including servers updated to Hotfix 3 a day earlier — needs Hotfix 4. N-able's incident notice says the flaw has been exploited in the wild; its release notes say that is unconfirmed.

Nightmare Eclipse Drops CrowdStrike, Nvidia, Avast Zero-Day Exploits

SecurityWeek - 07 September 2026 13:15

The proof-of-concept (PoC) exploits lead to privilege escalation, spawning a shell with System privileges.

Adobe Commerce Zero-Day Exploited to Backdoor Online Stores

SecurityWeek - 07 September 2026 12:58

The StyleSmuggler zero-day allows attackers to execute code and deploy a stealthy backdoor on Adobe Commerce and Magento stores.

Threat actors and malware

Hackers Abuse Trusted Google Services to Hide Credential-Stealing Phishing Attacks

Cyber Security News - 07 September 2026 15:43

Criminals are using trusted Google services as cover for a wide phishing campaign that steals corporate credentials and, in some cases, installs remote-access software. The malicious path runs through Google-owned domains before reaching attacker-controlled pages for users and filters.

New Linux Bot Hides as Kernel Process and Launches DDoS Attacks

Cyber Security News - 07 September 2026 15:12

A new Linux bot called Tengu is built to stay hidden and turn compromised systems into tools for disruption. The 32-bit malware poses as a routine kernel worker, persists across several Linux setups, and can generate traffic floods against selected targets.

JSCeal Malware Can Bypass Google Authentication Using Stolen Session Cookies

The Hacker News - 07 September 2026 14:23

Cybersecurity researchers have unpacked JSCeal, a sophisticated compiled V8 JavaScript (JSC) malware with credential harvesting, surveillance, and traffic-interception capabilities.

Modified ScreenConnect Clients Used in Worm-Like Campaign

SecurityWeek - 07 September 2026 12:45

The attacks rely on backdoored ScreenConnect instances to transfer and execute payloads to newly connected clients.
